need a loan? we now have a low rate for that.

What's New

Refer a friend. Get \$100!

Tell your friends about the credit union difference! Not only will they thank you for introducing them to a banking experience with fewer fees, better rates and amazing people, they will also join a financial institution that has their best interests in mind. Better yet, if they open a direct-deposit checking account, you AND your friend will receive \$100 once their account is considered active*.

Getting your \$100 is easy. Give our contact information to a friend!

QUICKEN & QUICKBOOKS USERS:

We realize you have experienced an interruption in integrating Quicken products with our new Online Banking platform and apologize for any inconvenience this may have caused. To continue using Quicken and Quickbooks with our new Online Banking system, you must deactivate your old setting under Consolidated Federal Credit Union and reactivate under Consolidated Community CU.

Please follow the instructions below to modify your account settings:

- Updating Quickbooks for Mac & Windows
- Updating Quicken (Express Web Connect to Direct Connect)
- Updating Quicken (Web Connect to Direct Connect)

If you have any questions, please call us at **1.800.444.8115**.

NEW EMV CHIP CARDS COMING SOON!

Increased Security for your finances.

IMPROVED SECURITY:

We are replacing your existing debit card with a new chip card to increase your protection against fraud. For your convenience, the card number is the same, but your expiration date has changed.

?

WORLD-WIDE ACCEPTANCE

Your chip card will also make traveling easier and more convenient with its world-wide acceptance. Your card continues to have the traditional magnetic strip on the back, enabling you to use it at merchants without chip-enabled terminals.

HOW IT WORKS:

1. For payment transactions, merchants will ask you to insert your card into the terminal (slot is located on the bottom-front) or swipe the magnetic strip.
2. Sign or enter PIN number to validate identity. Leave card in the terminal until the transaction is complete.
3. Remove card when prompted.

STEPS TO USING YOUR NEW DEBIT CARD:

1. Activate new chip card: Activate your new chip card and select a PIN by using the instructions located on the card.
